Marine- Yachting & Boating Docking Device

Dock-Shox™ has it all! Using patented Slastix™ technology, Dock-Shox™ will stretch and absorb normal boat movement, make it easier to dock quickly, and adjust for any docking situation while saving your boat's hardware. The nylon webbing adjusts from 3 feet to 15 feet to secure your boat without having to buy separate lines for bow and stern moorage. Nylon webbing rests flat and stores away easily so you don't have to worry about messy coils of line on your deck. The 12" nylon loop allows for simple and quick mooring. Recommended for docking boats and personal water crafts.

Launchers™ take you into another level of water fun with water sports of all kinds. Slastix™ technology causes you to explode across the wake while using your inflatable water toys, water skis, or wakeboards. Launchers™ cause your tow line to act smooth at times you would typically experience the jolt of a slack tow rope. Skiers experience an easier up haul from deep water starts as well as feeling less pull on the arms and hands. Add up to four Slastix™ to your tow line and feel the difference. Includes four (4) Slastix™ Launchers™ and two (2) heavy duty nylon slings for easy tie in to your boat or personal watercraft.

Anchor-Shox™ eliminates the problem of paying out yards of anchor line in typical anchorage situations. Anchor-Shox™ will help protect your hull and defend it from unexpected shoreline activity that comes from beach mooring. Simply drop your anchor off shore and power forward to the beach. Complete your shore unloading and your boat safely returns to your chosen off shore anchorage.

Anchor-Shox™ also makes retrieving your boat an easy task when it's time to load up your boat.

Personal Water Craft Anchor-Shox™

Because of patented Slastix™ technology, your PWC will not move during typical shore wave action. Simply drop your anchor using PWC Anchor-Shox off shore and leave your PWC to absorb wave movement. Anchor-Shox™ will help protect your PWC's hull and defend it from unexpected shoreline activity that comes from beach mooring. Anchor-Shox™ stretches from 24" to 48" to accommodate wave action. With Slastix™ technology, storing away the Anchor-Shox™ is made easy because of its compact size.

Luv Handles™ give you the security of safely holding onto the driver while speeding over the water. Simply adjust the driver's comfortable waist belt so the passenger can easily hold onto the handles. The waist belt adjusts to fit most waist sizes from 32" to 42". Luv Handles™ are available in two different styles. The standard model comes with durable plastic handles and the deluxe model comes with comfortable rubber handles.

Fender Wonders™ give you endless possibilities when docking or rafting boats together. Easily adjusts from 2' to 6' providing you rapid protection in any situation! By threading heavy duty polypropylene webbing through the center or top of the fender, you can always trust your placement. A large ring at the bottom of Fender Wonders™ secures the fender and allows for additional lines to be attached. Includes two (2) Fender Wonders™ and two (2) Dock-Shox™.
